## Education

### IT Profile Middle School, Rabka-Zdrój

In September I started learning computer science at the Rabka-Zdroj high school. I will be finishing school in 2018, gaining qualifications in the field of technical exploitation of computers, networks and databases.

## Work Experience

### DHOLE DESIGN (FRONTEND + PYTHON)

from October 2015 to March 2018

In October I started working with another freelancer under the brand we created from scratch - Dhole Design. We designed and implemented websites for companies across Poland and Europe. Dhole Design gained experience with simple websites as well as with advanced customer ecommerce systems.

### INTERNSHIP AT MILENIUM.IT (PYTHON)

from February 2016 to March 2016

It was the internship which had to take place during the school year. It lasted two weeks, I could choose any company and apply there. My choice was milenium.it, the company where primary backend technology was Django.

### INTERNSHIP AT VEDIUS (FRONTEND)

from March 2017 to April 2017

As previously, this internship took place during the school year and lasted two weeks. I chose Vedium company in which I increased my Django and Frontend skills, creating project 'Cyfrowa Szkoła' and new Vedium website.

### LEANLE (C#)

from August 2017 to January 2018

I was working as C# developer, creating windows applications for public usage.

## Awards

### Google Code-In 2015 Winner

Google Code-In is an international competition aimed towards young aspiring software developers from around the world, lasting 2-3 months. During the competition we perform tasks for one of 14 open source organizations; my choice was Sugar Labs. In my year, there were 24 winners, two from each organization. I was lucky enough to be one of the winners, and in fact the only one from Poland. We won a few days in San Francisco and much more.
